Maturity Threat Analysis

Gain visibility and practical advice to effectively reduce your cyber security risk.

In an environment of increased digitalization, many organizations find it challenging to protect against many of today's emerging threats that can originate from various sources, utilizing numerous avenues of attack.

Our approach focuses on identifying your key cyber security exposures and reporting on your organization's overall posture. This includes providing prioritized recommendations to reduce your risk, based on industry accepted practices tailored to your environment.

The results of our assessment will enable management to collaborate when making risk management decisions, see the organization from an attacker's perspective and foster management's commitment to allocate resources and implement reasonable security solutions.

Benefits

At the end of this engagement, you will have the following:

- ✔ Benchmark against cyber security standards
- ✔ Identification of your key cyber security risks
- ✔ High-level cyber threat modeling
- ✔ Prioritized and practical recommendations to reduce your risk

Maturity Threat Analysis	
Objective	• Report on overall cyber security posture • Identify key cyber security risks • Provide recommendations to reduce risk and increase maturity
Activities	• Obtain an understanding of the operating and business environment, inherent risks, the role that technology plays in enabling core business operations, and how information is accessed, used, stored, transmitted and disposed of • Follow a risk-based approach to assess your cyber security controls, taking into consideration your operating environment and risk profile
Deliverables	• Maturity Assessment – benchmark report outlining the level of maturity within each assessment area against industry standards and aligned to your operating environment and risk profile • Risk Assessment – risk report outlining risks and potential impact that exist today or could emerge in the future based on the current state • Final Report – includes observations, findings, reference material, risk assessment and recommendations aligned to improving cyber security maturity and managing risk for your organization
Timing	• 4 – 8 Weeks
Team	• Cyber Security Assessment Lead and Senior Security Consultants
